

ARAVIND SREE UDAIYAKUMAR

Full-Stack Web Developer (MERN) | B.Sc Electronics & AI Student

Chengalpattu, Tamil Nadu, India • SRM Arts and Science College (SRMASC) • GitHub / GitLab / Vercel Portfolio

PROFESSIONAL SUMMARY

Driven Full-Stack Web Developer and B.Sc Electronics & AI student at SRM Arts and Science College (SRMASC) specializing in the MERN stack (MongoDB, Express, React, Node.js), Python programming, and Cloud/AI API integrations. Experienced in building responsive web applications, deploying projects via Vercel and GitHub, and leveraging advanced AI APIs (xAI Grok, GCP Vertex AI). Adept in SQL database management, hardware prototyping with Arduino microcontrollers, and scientific computing.

TECHNICAL SKILLS

Languages:	Python, JavaScript (ES6+), SQL, Julia, HTML5, CSS3
Web & Frameworks:	MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js, REST APIs
Cloud & AI Tools:	Google Cloud Platform (Vertex AI, BigQuery, Cloud Shell), xAI Grok API, SciML
Dev Tools & OS:	Git, GitHub, GitLab, Vercel, Arduino Microcontrollers, Linux (Ubuntu)

EXPERIENCE & TRAINEESHIPS

Maiyyam Knowledge and Careers Private Limited

Jul 2026 – Present

Full-Stack MERN Web Development Trainee

- Developing scalable web applications using React.js frontend architecture and Node.js/Express backend services.
- Designing NoSQL database structures with MongoDB and building RESTful APIs for seamless data exchange.
- Managing continuous deployment workflows using Git, GitHub, and Vercel for production-ready applications.

KEY PROJECTS & TECHNICAL ENDEAVORS

Generative AI & API Orchestration System

2026

- Implemented custom function calling and tool execution workflows using xAI Grok API endpoints and Google Cloud Vertex AI.
- Utilized BigQuery and Python script automation for data processing, analysis, and cloud service integration.

Hardware & Embedded Systems Prototyping

2025 – 2026

- Engineered hardware interfaces and sensor monitoring circuits using Arduino microcontrollers and micro-electronics.
- Programmed embedded systems logic for practical real-time hardware control and signal processing.

EDUCATION & ACADEMIC BACKGROUND

SRM Arts and Science College (SRMASC)

Undergraduate

Bachelor of Science (B.Sc) in Electronics & Artificial Intelligence

- Core Focus: Applied Electronics, Microcontroller Systems, Artificial Intelligence, and Computer Science.
- Completed advanced coursework covering Mathematics, SQL Database Management, and Scientific Computing.

WORKSHOPS & COMMUNITY ENGAGEMENT

- Design Championship Technical Competition:** Participant in technology and software design competition.
- NVIDIA GTC & GDG Technical Events:** Active attendee in NVIDIA GTC virtual conferences and Google Developer Groups (GDG) workshops.
- Development Environment:** Practical proficiency in Ubuntu Linux terminal environments and software development tooling.
